

std::exception

```
graph BT; ReviveError --> ItemError; ItemError --> std_exception[std::exception];
```

The diagram illustrates a vertical inheritance hierarchy. At the top is a box labeled 'std::exception'. A blue arrow points from a box labeled 'ItemError' below it to 'std::exception'. Another blue arrow points from a box labeled 'ReviveError' at the bottom to 'ItemError'. The 'ReviveError' box has a gray background, while the others are white with gray borders.

ItemError

ReviveError
